

**COLAC OTWAY PLANNING SCHEME
GREATER GEELONG PLANNING SCHEME
GOLDEN PLAINS PLANNING SCHEME
SURF COAST PLANNING SCHEME
QUEENSCLIFFE PLANNING SCHEME
AMENDMENT GC228**

EXPLANATORY REPORT

Overview

The proposed amendment amends the Colac Otway, Greater Geelong, Golden Plains, Surf Coast and Queenscliffe Planning Schemes to rezone a number of Barwon Water owned and managed properties to Public Use Zone 1 - Service and Utility (PUZ1) to reflect the ownership and purpose of the land and to delete a redundant Public Acquisition Overlay from land already acquired by Barwon Water in Banks Road, Ocean Grove.

Overlay Maps

In the Greater Geelong Planning Scheme, the proposed amendment:

- Amends Planning Scheme Map No: 82PAO to delete Public Acquisition Overlay 7 (PAO7) from the property at 762-764 Banks Road, Ocean Grove.

Strategic assessment of the amendment

Why is the amendment required?

The amendment is required to correct zoning anomalies within the planning schemes. Barwon Water reviewed the zoning controls of all its assets and identified 40 properties where the zoning does not reflect the existing use of the land. In addition, a review of the planning controls identified a property that was subject to a Public Acquisition Overlay (in favour of Barwon Water in the Greater Geelong Planning Scheme), which is no longer required as Barwon Water has now acquired and developed the land for a sewer pump station.

All of the identified properties are owned and managed by Barwon Water with established water and sewerage assets. Rezoning the identified properties will contribute to the efficient operation of the relevant planning schemes. Inclusion of the land in the PUZ1 and deletion of a redundant PAO7 (in the Greater Geelong Planning Scheme) is proper and orderly planning and identifies land that is required for ongoing water and sewerage service delivery.

How does the amendment implement the objectives of planning in Victoria?

The amendment implements the provisions of Section 4 of the *Planning and Environment Act 1987* by ensuring that the inclusion of the identified properties in an appropriate zone reflects the landownership, status and as-built conditions of the land and provides for protection of property assets into the future.

How does the amendment address any environmental, social and economic effects?

The amendment makes a number of minor zoning corrections to the planning schemes, which will have no significant environmental, social or economic impacts on the land use or development outcomes as intended by the planning schemes.

The amendment as drafted does not propose any new use or development on the identified parcels of land.

Does the amendment address relevant bushfire risk?

The amendment is administrative in nature and will not impact on bushfire risk as no land use changes or development concepts are proposed.

Does the amendment comply with the requirements of any Minister's Direction applicable to the amendment?

The following Minister's Directions are relevant to this proposed amendment.

Ministerial Direction on the Form and Content of Planning Schemes

The amendment is consistent with the Ministerial Direction on the Form and Content of Planning Schemes under section 7(5) of the *Planning and Environment Act 1987*.

Ministerial Direction No.11 Strategic Assessment of Amendments

The amendment has been prepared having regard to the Ministerial Direction No. 11 – Strategic Assessment of Amendments and Planning Practice Note 46: *Strategic Assessment Guidelines for Planning Scheme Amendments*.

Ministerial Direction No. 18 – Victorian Planning Authority Advice on Planning Scheme Amendments

The amendment includes land within Precinct Structure Plans (PSP) within the City of Greater Geelong and are managed by the Greater Geelong City Council. Barwon Water has consulted Council in relation to the proposed amendment and confirmed with Council that the amendment will not impact the ongoing development of the PSP.

Ministerial Direction No. 17 – Localised Planning Statements

The amendment includes land within Ocean Grove, Point Lonsdale, Connewarre and Queenscliff within the Bellarine Peninsula. The Bellarine Peninsula Localised Planning Statement applies to the amendment.

The Bellarine Localised Planning Statement seeks to identify key attributes of the area and put in place strategies to ensure they are preserved and enhanced for ongoing use by present and future generations.

The amendment will not result in any land use change within the Bellarine Peninsula as it corrects the zoning on properties which already have Barwon Water assets established. The amendment is consistent with the policy objectives and strategies within the Bellarine Peninsula Localised Planning Statement.

How does the amendment support or implement the Planning Policy Framework and any adopted State policy?

The following clauses of the Planning Policy Framework are relevant to the amendment:

Clause 11 Settlement

The amendment will change the zoning of existing Barwon Water properties which have been developed for water and sewerage infrastructure. The amendment will assist in making it clear where existing infrastructure is located on the zoning maps to ensure incompatible land uses are not sited close together.

The objective of Clause 11.02-2S (Structure planning) is to facilitate the fair, orderly, economic and sustainable use and development of urban areas. The amendment will clarify the zoning of existing Barwon Water owned land to assist in facilitating the logical and efficient provision of infrastructure and services.

The objective of Clause 11.03-2S (Growth areas) is to locate urban growth close to transport corridors and services and provide efficient and effective infrastructure to create sustainability benefits while protecting primary production, major sources of raw materials and valued environmental areas. The amendment includes the rezoning of existing services and infrastructure within some growth areas. The rezoning will not prejudice existing Growth Areas Framework Plans nor compromise the delivery of any associated Precinct Structure Plans.

The amendment supports Clause 11.03-4S (Coastal settlement) by making it clear where existing water and sewerage infrastructure is located. A strategy of this clause is to “*ensure a sustainable water supply, stormwater management and sewerage treatment for all development*”. Barwon Water has established the relevant infrastructure to support coastal settlements and the amendment seeks to reflect the existing land uses in the Public Use Zone 1 (Service and Utility).

The objective of Clause 11.03-5S (Distinctive areas and landscapes) is to recognise the importance of distinctive areas and landscapes to the people of Victoria and protect and enhance the valued attributes of identified or declared distinctive areas and landscapes. Distinctive Areas and Landscapes have been declared for the Bellarine Peninsula and Surf Coast. The Statements of Planning Policy included within the Distinctive Areas and Landscapes place requirements on Responsible Public Entities (RPE's), which includes Barwon Water. The amendment does not include any proposed use or development, rather a correction of the zoning of land which has been developed

for water and sewerage infrastructure. Accordingly, the amendment is consistent with the existing Statement of Planning Policies as they apply to Surf Coast and the Bellarine Peninsula.

The objective of Clause 11.03-5R (The Great Ocean Road region) is to manage the sustainable development of the Great Ocean Road region. The amendment will rezone existing infrastructure to a Public Use Zone 1 – Service and Utility to support existing and future development in the area.

The amendment will not prejudice the ongoing objectives and strategies associated with Clause 11.03-6L (Bellarine Peninsula) as it applies to the Greater Geelong Planning Scheme. The amendment only proposes to rezone existing properties which have previously been developed with water and or sewerage infrastructure and is not expected to impact on the identified or preferred character of towns in the area.

Clause 11.03-6L-01 (Bannockburn) of the Golden Plains Planning Policy Framework (PPF) is supported by the amendment, in that the rezoning will assist in identifying existing water and sewerage assets within Bannockburn and allow for compatible non-sensitive uses to be developed within any identified buffers.

The objective of Clause 12.05-2L (Landscapes in the Great Ocean Road and south west coast region) in the Surf Coast Planning Scheme is *“to minimise the visual and environmental impact of development on the region and its landscapes through its siting and design, ensuring that it complements or enhances the distinctive coastal or bush character of the locality and protects viewsheds”*. The amendment does not include any development within the areas subject to this policy. The property in the designated area (Fairhaven) is a pipeline and no further use or development is considered as part of this proposed amendment.

Clause 13 Environmental Risks and Amenity

The objective of Clause 13.07-1S (Land use compatibility) is to protect community amenity, human health and safety while facilitating appropriate commercial, industrial, infrastructure or other uses with potential adverse off-site impacts.

The amendment supports Clause 13.07-1S in that the rezoning will remove any ambiguity associated with the infrastructure use of the land and ensure clarity of the assets for anyone seeking to develop nearby.

The objective of Clause 13.07-1L-01 in the Greater Geelong Planning Scheme (Non-residential uses in residential zones) is to provide for non-residential uses that serve the needs of the local community and to support non-residential uses that are compatible with the residential character, scale and amenity of neighbourhoods. The clause outlines strategies for relocating non-residential uses on main roads and avoiding a de-factor commercial area. The amendment seeks to correct the zoning from General Residential or Urban Growth Zones (in identified cases) to the more appropriate PUZ1 to ensure land is protected and zoned appropriately for the long term.

Clause 14 Natural Resource Management

The objective of Clause 14.02-2S is to protect water quality. The amendment will make it clear where existing Barwon Water assets, such as pipelines and water storages are located to help protect them from inappropriate adjoining uses.

Clause 14.01-1L (Protection of agricultural land) in the Colac Otway PPF seeks to protect Farming Zone, Rural Conservation Zone and Rural Activity Zoned land from inappropriate development, particularly on small lots. The amendment will support this clause in that it will ensure the land is appropriately zoned for the existing land use and avoid any potential confusion associated with development on small lots.

Clause 14.01-1L-01 (Protection of agricultural land in Surf Coast) of the Surf Coast Planning Scheme will not be detrimentally impacted by the amendment. The clause seeks to discourage development that impacts on agricultural land. The rezoning of Farming Zone land and Rural Conservation Zone land to Public Use Zone 1 (Service and Utility) reflects the existing land uses and no further development of the land is proposed as part of this amendment.

Clause 19 Infrastructure

The objective of Clause 19.03-3S (Integrated water management) is to sustainably manage water supply and demand, water resources, wastewater, drainage and stormwater through an integrated

water management approach. The amendment supports this clause by clearly identifying where water (and wastewater) infrastructure is located within the urban environment.

How does the amendment support or implement the Municipal Planning Strategy?

The amendment supports the Municipal Planning Strategy of the Colac Otway Planning Scheme.

The amendment seeks to correct the zoning of existing Barwon Water properties to reflect the existing land uses, which is consistent with providing appropriately zoned as detailed in Clause 02.03-1 (Settlement).

The amendment will support Clause 02.03-8 (Infrastructure) by ensuring clarity over land that is already being utilised for infrastructure purposes as these facilities service the surrounding communities within the Shire.

The amendment supports the Municipal Planning Strategy of the Golden Plains Planning Scheme.

The amendment is consistent with Clause 02.03-1 (Settlement) by rezoning land within Bannockburn, one of the designated towns where rezoning continues to be required to accommodate expected future growth. The rezoning of the Barwon Water landholdings will assist in identification of existing water and sewerage assets required to service the growing township.

The amendment supports the Municipal Planning Strategy of the Greater Geelong Planning Scheme.

The amendment will not impact on the Armstrong Creek Urban Growth Area and the associated Framework Plan. Rezoning of land within the growth areas to PUZ1 will not impact adversely on the existing or underlying zoning of the area nor impact on any of the infrastructure contributions for the precincts. Rather, the amendment will assist in providing clarity where existing water and sewerage infrastructure is located within the area.

The amendment supports 02.03-09 (Infrastructure) in that the infrastructure has been designed and developed by Barwon Water to service the surrounding existing communities and emerging communities in urban growth areas within the City of Greater Geelong. The amendment will accurately reflect the existing use of land by Barwon Water and remove any ambiguities associated with the use of the land for service and utility purposes. Further, the amendment will delete a redundant Public Acquisition Overlay 7 (PAO7) that was included in the Greater Geelong Planning Scheme to allow Barwon Water to acquire land for a future sewerage pump station. The land has now been acquired by Barwon Water and the pump station has been constructed and the PAO7 no longer serves any purpose in the planning scheme.

The amendment supports the Municipal Planning Strategy of the Queenscliffe Planning Scheme.

The amendment applies to land that has already been developed for infrastructure purposes. Accordingly, the amendment seeks to correct the zoning controls applying to land within the Borough of Queenscliffe and thereby supporting Clause 02.03-8 (Infrastructure) as the amendment will not result in any adverse impact on urban stormwater or discharges on the water quality of Swan Bay.

The amendment supports the Municipal Planning Strategy of the Surf Coast Planning Scheme.

There are no specific clauses within the Surf Coast related to the rezoning.

Does the amendment make proper use of the Victoria Planning Provisions?

The amendment meets the form and content requirements of the Victoria Planning Provisions. Inclusion of the identified land parcels within the Public Use Zone 1 – Service and Utility assists in identifying existing water and sewerage infrastructure services. The PUZ1 is the most appropriate zone for the utilities established on the site.

The amendment will also delete a redundant Public Acquisition Overlay 7 within the Greater Geelong Planning Scheme that was included to allow Barwon Water to acquire land within Ocean Grove. The PAO7 is no longer required as Barwon Water has now purchased and developed the site.

How does the amendment address the views of any relevant agency?

Barwon Water has consulted with relevant stakeholders, including the Colac Otway Shire, Golden Plains Shire Council, Greater Geelong City Council, Borough of Queenscliffe and Surf Coast Shire Council. In addition, Barwon Water has also consulted with the local offices of the Department of Transport and Planning (DTP) in the preparation of the amendment.

Does the amendment address relevant requirements of the Transport Integration Act 2010?

The amendment is administrative in nature and ensures appropriate controls apply to established infrastructure assets. There is no impact on the transport system or the requirements of the *Transport Integration Act 2010* as a result of this proposed amendment.

Resource and administrative costs

What impact will the new planning provisions have on the resource and administrative costs of the responsible authority?

Barwon Water has prepared the amendment to reduce the resources requirements on the identified local government offices. The amendment reduces the regulatory burden for the relevant Councils by ensuring the use and development of the identified land parcels are appropriately regulated by the Public Use Zone 1 (Service and Utility).
