

# FITTING A MODERN CLOTH REUSABLE NAPPY

1. Adjust the size (PTO to see guide). Tuck any folded fabric up towards the belly.

2. Place nappy under baby's bottom

3. Pinch the front and bring it between the legs onto the tummy

4. Snap a side tab onto the front panel, snug but not too tight

5. Repeat for the other side. The side tabs should not overhang baby's thighs

6. Run your finger around each leg seam so the elastics sit in the leg crease

7. Ensure nappy waist isn't too tight. Two fingers should fit

8. The nappy should be level front to back
