

ADJUSTING THE SIZE

If your nappies have rows of press studs/snaps they are adjustable (see snaps in the large image below).

1. Change the nappy length - using the vertical rows of rise snaps (located on the front).
2. Change the waist fitting - using the horizontal wing snaps (on the side tabs).

You can keep changing the nappy size as baby grows using by expanding snaps used from extra small to large – see below:

EXTRA SMALL

SMALL

MEDIUM

LARGE
